

Tables with dynamic count of columns.

Desired output:

Color of think	Type of thing			
	<i>fruit</i>	<i>vegetables</i>	<i>stone</i>	<i>thing</i>
<b>yellow</b>	banana	capsicum	pyrite	taxi
<b>red</b>	apple	tomato	cinnabar	doubledecker
<b>green</b>	guava	cucumber	aventurine	card

Real output:

Color of think	{% colspan col_labels count %}Type of thing		
	{%tc for col in col_labels %}	{{ col }}	{%tc endfor %}
{%tr for item in tbl_contents %}			
{{ item.label }}	{%tc for col in item.cols %}	{{ col }}	{%tc endfor %}
{%tr endfor %}			

Please note that it is neccessary to format cells inside for loop with all borders if you want borders in the table.
